

CLAIMS

I claim:

Claim 1. A spacer block for attaching a guard rail to a post, comprising:

- 5 a generally rectangular block of a polymer;
 said block including a top positioning tab for engaging the top edge of said post;
 said block including means extending from the face thereof for supporting a guard rail thereon;
10 said block including at least one bore therethrough; and
 said block including at least one side tab for positioning said block with respect to said post.

Claim 2. A spacer block for attaching a guard rail to a post, comprising a thermoplastic polymer and a rubber material.

15 Claim 3. A spacer block comprising a structural foam thermoplastic composition.

Claim 4. A spacer block comprising a structural foam thermoplastic and rubber composition.
